Awesh Kumar

Software Engineer

+92-370-1684085 aweshkumar0346@gmail.com linkedin.com/awesh github.com/awesh

Objective

Software Engineer with hands-on experience in backend and full-stack development, focused on building secure, scalable, and high-performance applications using Java, Spring Boot, RESTful APIs, and modern web technologies. Experienced in developing enterprise-grade banking and financial solutions, including core banking integrations and database-driven systems, serving clients across MENA and European markets. Strong foundation in microservices, OOP, and system design, with a passion for writing clean, maintainable code and delivering reliable digital solutions.

Education

National University of Computer and Emerging Sciences - FAST **Karachi, Pakistan**
Bachelor of Science in Computer Science *Sep 2021 – May 2025*

- **Concentrations:** Enterprise Backend Systems and Java Application Development
- **CGPA:** 3.1/4.0
- **Related Coursework:** Data Structure, Web Programming, Artificial Intelligence, Software Engineering, Fundamentals of Accounting, Psychology, Graph Theory, Design and Analysis of Algorithm, Parallel and Distributed Computing, Software Design and Analysis, Information Security, Information System Audit and Control, Block-chain and Cryptocurrency, International Business

Experience

Xpert Digital **Karachi, Pakistan**
Associate Software Engineer *Nov 2025 – Present*
European Digital Banking Implementation — Artea Bank, Lithuania

- Developed and maintained backend applications using Core Java, applying object-oriented programming principles and industry best practices
- Designed, implemented, and integrated RESTful APIs with third-party systems to enable secure and reliable data exchange
- Developed and enhanced banking modules including Deposits, Accounts, and Utilities by implementing business logic and transaction workflows
- Worked extensively with relational databases, writing SQL queries, performing data validation, and optimizing database operations

Techlogix **Karachi, Pakistan**
Software Development Trainee Engineer *Sep 2025 – Nov 2025*

- Designed and developed a full-stack web application using Spring Boot (Java) and Knockout.js
- Built responsive user interfaces with HTML and CSS, integrating dynamic data binding in JavaScript
- Enhanced application performance and user interactivity through efficient frontend–backend integration

National University of Computer and Emerging Sciences - FAST **Karachi, Pakistan**
Student Teaching/Lab Assistant *Aug 2022 – Aug 2024*

- Assisted in delivering undergraduate programming and lab courses by supporting instructors and mentoring students
- Guided students in coding assignments, debugging, and problem-solving to strengthen core programming concepts
- Focus on mentoring programming assignments and debugging and provided technical feedback to improve code quality and learning outcomes

Technical Skills

Languages: C, C++, Java, Python, PHP, JavaScript, HTML, CSS
Libraries/Frameworks: Spring Boot, Spring MVC, Spring Data JPA/Hibernate, Spring Security, Spring Cloud, React, Augular, Bootstrap
Databases: MongoDB, MySQL, PostgreSQL, Oracle, DBeaver, Database Indexing
Developer Tools: IntelliJ IDEA ,VS Code, Git, Github, Source Tree, Postman, Linux, SQL Developer, Google Colab, Jupyter
Build and Test Tools: Maven/Gradle, JUnit5
Documentation and API: OpenAPI 3.0, Swagger UI, API Documentation Standards, Postman Collections
Core Concepts: OOP, Data Structure and Algorithm, Design Patterns, Microservice Architecture, SOLID Principles
Security and Authentication: Spring Security, JWT, CORS Configuration

PROJECTS

Help.com-FYP | *React, Spring Boot (Java), MySQL, Hibernate, Google Maps API, Maven, VS Code*

- Developed a full-stack social welfare platform using React and Spring Boot to manage donations and volunteer coordination
- Implemented secure RESTful APIs with JWT authentication, a relational MySQL database, and Google Maps API for location-based NGO and event discovery.

Quiz Master | *C, C standard Library, Github, VS Code*

- Created an interactive C-based quiz game with multi-category questions, lifelines, and high score tracking to enhance user engagement and learning

Inventory Management System | *Spring Boot, Hibernate, MySQL, JavaScript, VS code, Maven*

- Built a Spring Boot–MySQL–based retail inventory system with real-time order tracking, secure user management, and dynamic media file handling.

Learning Management System | *Java17, Spring Boot, Spring Security, Hibernate, MySQL, Maven*

- Designed a full-stack LMS using a Java/Spring Boot stack (Spring Security, JPA/Hibernate, PostgreSQL) to streamline course delivery, student engagement, and role-based access for educational institutions.

ACHIEVEMENTS

Runner-Up **2022 - 2023**
Developers Day Speed Programming Competition *FAST NUCES*

Dean'n List **June 2025**
Recognized on the Dean's List for academic excellence (GPA: 3.67/4.0). *FAST NUCES*
